

Prospector Sand Management Facilities

Spherical Sand Separators

The spherical design gives more square feet of surface area than standard vertical & horizontal sand separators, providing longer contact for particulate removal.

Advantages

- Cost savings of up to 85% on repairs and Maintenance
- Design was for 3000 BPCD and 50 MMSCFD
- Suitable for sour gas or NACE service
- Don't have to shut in a well to clean out

Simple

- No filters to change
- Do not have to break apart to clean out
- Can set up with automatic dump
- Has a 2500# flanged RTJWN or fig 1502
- Compact Stands 8ft x 4ft
- Can set up anywhere

Sand separators are designed to protect your field processing and testing equipment from the erosion effect of sand coming from the well bore & formation, this includes frac sand and other solids.

ASME code and stamped with a National Board number.
